statswales_get_dataset

Retrieves a dataset from StatsWales

Description

statswales_get_dataset returns a dataframe from **StatsWales** using a dataset id.

Usage

```
statswales_get_dataset(id)
```

Arguments

`id` A dataset id. Must be a single string.

Value

If the dataset id is valid, the function will return the requested dataset in a dataframe. If the id is not valid, the function will return NULL.

Examples

```
data <- statswales_get_dataset("LGFS0021")
```
